ABOUT

I started my career ensuring software works flawlessly — now I build systems that think for themselves. With a strong foundation in automation and software reliability, I transitioned into AI, designing SaaS and PaaS solutions that help clients solve unique problems with speed, scalability, and intelligence. I bring a "nothing is impossible to build" mindset — integrating LLMs into workflows, automating decision-making, and creating cloud-native applications that work smarter.

EXPERIENCE

AI Automation Developer
Jun 2025 - Present

Weber Media® Consulting GmbH · Contract · Remote

Building AI-powered automation systems, integrating LLMs into business workflows, and developing intelligent cloud-native applications.

N8n, Claude Code, Supabase, Lovable AI, MCP, Stripe, ElevenLabs, Veo3, Airtable, GCP, Amazon Bedrock, Docker, RAG

QA Automation Developer
Dec 2021 - Present

RLDatix & Allocate Macedonia · Full-time · Skopje

Developed robust automation frameworks and pipelines, ensuring software reliability at scale with modern frameworks and CI/CD practices.

Python, Robot Framework, Selenium WebDriver, Jenkins, GoCD, GitHub, CI/CD
